Garden Tulips The two most popular classes of Garden Tulips are the **Darwins** and the **Breeders**. We here illustrate a fine selection of varieties recommended and grown for us by the best bulb growers in Holland, and imported by us in large quantities. All late flowering varieties.

Giant Darwin Tulips

(SELECT LIST)

- ① **PROF. RAUWENHOFF**—Full cherry rose with ivory white and blue star at base, flower of enormous size. Excellent forcer.
- ② **SCARLET BEAUTY**—Scarlet, very fine flower.
- ③ **DAL ONGARO**—Lavender violet, extra fine for forcing.
- ④ **LE NOTRE**—Bright rose, early forcing variety, strong stem.
- ⑤ **CLARA BUTT**—Clear self-colored salmon rosy pink.

Giant Breeder Tulips

This class is similar to the Darwins, except in colors. If you want something different and of real artistic merit try these:

- ⑪ **JAUNE D'OEUF**—Rose lilac, broadly edged yellow.
- ⑫ **APRICOT**—Apricot, flushed orange.
- ⑬ **ROI DE SIAM**—Purple violet, very fine.

FOR OTHER OFFERS OF TULIPS SEE PAGES 4, 5 AND 6.

SIX OF THE BEST GARDEN ROSES

Price, for 1 year old plants from 2½-inch pots, 15 cents each; set of 6 for 75 cents. Plants, 2 year old from 4-inch pots, 40 cents each; 6 for \$2.00.

These have all proven their great value as worth while for garden planting. They are perfectly hardy after having become well established. Their colors are gorgeous, and bloom is abundant. The plants are from greenhouses and should not be exposed to extreme cold too suddenly.

Dixie

Dixie This wonderful Hybrid Tea Rose is about as satisfactory a garden Rose as we know of. Strong grower, bearing the greatest profusion of large, splendidly formed, cup shape fragrant flowers of marvelous beauty. Color deep salmon pink. A great garden Rose.

Golden Ophelia

GOLDEN OPHELIA—The flower is of medium size, from a beautifully formed bud of bright, golden yellow. Has excellent texture; profuse in bloom; makes a marvelous "bush."

MADAME BUTTERFLY—Fancy colored Rose. The buds are a lovely shade of Indian red, yellow at the base; they are unique for corsages and for low table decorations. All the color tones are strong, making it a harmony of bright pink, apricot and gold.

Mme. Butterfly

Augusta Victoria

KAISERIN AUGUSTA VICTORIA—Continuous bloomer, producing successive crops of buds, and formed with large petals of best substance; shows no center when fully open; color pure creamy-white.

Red Radiance

RADIANCE

RADIANCE—Brilliant rosy-carmine, displaying beautiful opaline-pink tints in the open flower. The form is fine; flower large and full with cupped petals. A fine variety, especially on account of its value as a summer cut flower variety. Lasting qualities of the flower are wonderful.

RED RADIANCE

RED RADIANCE—Similar to Radiance, in form and growth, except color, which is a fiery-scarlet. Excellent garden Rose as well as a good forcer. Form is fine, flower large and full cupped petals.

THERE IS NO CLASS OF FLOWERS

so much prized as those which are produced from bulbs. Closely following the disappearance of snow and long before ordinary outdoor flowers are in bloom, we may have, in their perfection, the hardy Crocus; then the fragrant and stately Hyacinths; a little later the varied and brilliant Tulips. These give an air of distinction and refinement to any lawn or garden, affording much pleasure to all who pass by.

WHEN TO PLANT

We would particularly emphasize the fact that **fall** and **not spring** is the time to plant all kinds of spring flowering bulbs. The bulbs should be planted as soon after September as possible, so that the roots will make good growth before the cold weather sets in. They may be set out from then until the ground becomes frozen. They require a moderately rich soil. When the ground freezes hard, the bed should be covered with three or four inches of leaves or dry litter. Too early and heavy covering starts the tops prematurely. In the spring the covering should be carefully removed.

HARDY LILIES FOR FALL PLANTING**LILY CANDIDUM**

ALSO KNOWN AS MADONNA OR ANNUNCIATION LILY

Imported by us direct from France

The old-fashioned pure white garden Lily. One of the hardiest flowers, snow-white, with yellow stamens and sweetest fragrance. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. As spotlessly pure as the Easter, but with broad, widely opened flowers. Tall and stately growing and a sure bloomer. Fragrant. Large bulbs, 30 cents each; 4 for \$1.00; 12 for \$2.50.

HARDY REGAL OR ROYAL LILY

"One of the most beautiful of all known lilies. Highly recommended for general culture both for the open ground and for pots."

The outside of the flower is white, very faintly tinged with yellow at the base of the trumpet, and with pink at the point. The midribs are purple. Mature bulbs produce plants 3 to 4 feet high, bearing 3 to 10 flowers. Price, 40 cents each; 3 for \$1.10; 6 for \$2.00.

Our "Rainbow" Collection of Hyacinths

An increasing number of this collection is sold each year, which is proof of its popularity.

For Bedding Out in the Fall, or for House Culture in Pots and Boxes. Superb Mixture and Color.

In this collection of twenty bulbs we have chosen two each of the most distinct colors of this beautiful flower; this will give a grand effect when massed in a bed, and will show all the colors in striking contrast. Two Single Bright Red.

Two Single Dark Blue.

Two Single Lemon Yellow.

Two Single Pure White.

Two Single Pure Pink.

We Will Send the "RAINBOW" COLLECTION for \$3.00, Mail or Express Prepaid. Each Bulb is Wrapped and Labeled, Showing Color. You will not be disappointed in this Collection.

These bulbs are the product of one of the best growers in Holland, and are good size, solid and will produce splendid flowers.

NAMED DUTCH HYACINTHS

LARGE, PERFECT BULBS OF FINEST QUALITY

We have endeavored to get the very best in quality from best Holland growers. We import direct from the best known growers and customers may be assured that no better bulbs are to be had for the price asked.

For winter and early spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during the winter or in the garden in early spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected a list, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color. Plant Hyacinth bulbs 4 inches deep.

On account of scarcity and high price of **DOUBLE FLOWERING HYACINTHS**, we do not offer them this season. The single flowering varieties are fast displacing them.

Specially Selected Hyacinths

This list contains such only as are real beauties, and a few varieties, which are not entirely new, but to which we wish to draw your special attention. Price, 18c each, six for \$1.00, postpaid.

ARENTEINE ARENSEN

Snow-white. The spike is unusually well filled and has a perfect round shape. The broad, wide open petals are of intense whiteness and make the flower look unusually bright and pretty.

BUFF BEAUTY

Buff orange-yellow, long narrow truss on strong stem. A very peculiar color.

GENERAL DE WET

Light pink. Splendid for bedding as well as for forcing. The medium sized bells are of a lively light pink color with a lighter center and form a big, loose spike.

LADY DERBY

Bright rose-pink. Is rapidly becoming the leading pink pot hyacinth owing to its lovely shade of pink, its perfect spike on a strong stem and its splendid forcing qualities.

MYOSOTIS (Forget-Me-Not)

Beautiful blue, the only variety of this shade, large, strong spikes. Early flowering.

PERLE BRILLIANT

Light blue, tinged lavender. Produces an enormous spike of perfect shape and a big, smooth bulb. One of the best of the latest blue varieties.

Eight Superfine Single Hyacinths

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom; which are generally of better substance.

Price, 16 cents each, or the Full Set of Eight for \$1.20, postpaid.

INNOCENCE—Pure white, very large, compact spike, fine for early forcing.

GERTRUDE—Dark pink. The most popular pot and bedding Hyacinth, owing to its color and compact growth. Grown in larger quantities than any other kind.

GIGANTEA—Large, tall spike; large and very shapely, with drooping bells. Flowers shell-pink inside and deep pink outside, touched with violet. A superb sort.

GRANDE BLANCHE—Blush-white. Called also the white Regulus, being a sport of this old variety. Splendid bedder and early forcer.

KING OF THE BLUES—Rich dark blue, the finest of the deep

blues; extra large, well furnished broad spikes with large bells; erect and fine for pots.

KING OF THE BELGIANS—Bright scarlet. The most popular of the scarlets. Its upright well-filled spikes make it a good pot Hyacinth and as clear bright colors are mostly used for bedding, it is one of the most popular bedders. Immense stock.

LORD BALFOUR—Lilac-rose tinged dark violet; very early, enormous truss; the best in its color.

YELLOW HAMMER—Golden-yellow. The most popular of the yellows and a splendid forcer. The medium-sized bells form a very compact, ball-shaped truss, which makes one think of a hammer, hence its name.

BREEDER TULIPS Distinct from all others

A distinct class of late flowering Tulips, allied to the Darwin and Cottage types, which is just now enjoying a revival of its old time prestige. The present popularity of "art tones" in all classes of flowers is mainly responsible for this quickened interest, the Breeders furnishing beautiful combinations of dull or soft tones in buff, reds, browns, bronze or purple, in extremely large and well-shaped flowers; very long stems.

Not well adapted to forcing, but of superior value in every out-door usage.

Price, 10 Cents Each; Set of 6 for 55 Cents; \$1.00 per Dozen; \$7.00 per 100, Postpaid.

CLIO (Bronze Queen)—Light bronze; very fine.

CHESTNUT—Very dark brown, almost black, shows off splendidly when planted together with a yellow Tulip.

LA VICTOIRE—Heavenly blue, late, extra, very striking.

PANORAMA—Dark orange red. We recommend it highly.

NOIR VERITABLE—Very dark violet, long known as the Black Tulip.

SUNRISE—Ruddy apricot with yellow edge. The red color on the outside grows lighter towards the edge, an odd but attractive variety.

FOR OTHER VARIETIES, SEE FIRST PAGE OF COVER.

Breeder Tulip.

GIANT DARWIN TULIPS

Price, 8 cents each; 85 cents per dozen; \$6.50 per 100, Postpaid.

The Giant Darwin Tulips are late flowering Garden Tulips, and produce very large bowl-formed flowers of symmetrical shape and lasting wax-like substance on tall, strong stems, two to three feet high, and are exceedingly beautiful and effective grown in groups, in the shrubbery or herbaceous border, or in gardens with a background of greenery. They by far surpass in color and brilliancy anything before known in Tulips. They include almost every conceivable color and shade. Tulip bulbs should be set 3 inches deep, about 6 inches apart, in rows 8 to 10 inches apart.

Darwin Tulips

ISIS—Fiery crimson-scarlet with blue base, large and beautiful.

KATE GREENWAY—One of the largest and latest of all the Darwins. A grand big flower of white suffused with lilac; tall grower.

NAUTICAS—Purplish-rose, with dark violet base shaded bronze; very large flower on a tall stem.

ORION—Enormous flower, brilliant dark scarlet with blue centre.

PRIDE OF HAARLEM—Brilliant rosy-carmine with blue base. This is one of the oldest varieties, but hard to beat yet in color and size. Most flowers have more than six petals, which makes them look semi-double sometimes. It will remain a standard variety as long as Darwins are used.

QUEEN WILHELMINA—Very large flower. Tall stem. Flesh tinted rose. A very fine shade.

REV. EWBANK—Silvery heliotrope, darkening to lavender and violet at base.

TULIPE NOIR—Rich, glossy black-maroon, one of the best dark varieties. A popular novelty.

WHITE QUEEN—White. Can be called the only white Darwin. It opens rosy-white, but passes off pure white. One of the most popular varieties, which can be easily forced.

YELLOW DARWIN (New)—A beautiful and striking Tulip having a fine deep yellow flower; color, solid; very fine.

ZULU—Rich velvety purple-black, large egg-shaped flower.

BARONNE DE LA TONNAYE—A long and beautiful flower; clear carmine-rose at the midrib, toning off to soft pink on the edges; base white, tinged blue; height twenty-four inches. The leading bedder of the pink Darwins, keeping its brightness and standing upright to the last, no matter what kind of weather it is in.

BARTIGON—One of the most popular scarlets. The flower is large and carried on a tall, stiff, stem.

CLARA BUTT—A large flower of remarkable beauty; coloring an exquisite shade of soft salmon-pink shaded rose; height 20 inches.

DREAM—A very large deep violet.

FARNCOMBE SANDERS—One of the largest and most beautiful of all Darwins; color brilliant, dark rosy red, with a clear white base.

GLOW—Bright crimson-scarlet. A variety of unsurpassed qualities for bedding, but too little known. The unusually tall and strong stem holds the big flower up perfectly. The flower lasts very long and the bright crimson color never fades. One of the brightest and best of the Darwins.

SUPERFINE, MIXED DARWIN TULIPS

Our supply of these comes from a specialist who grows over fifty sorts, most of which are represented in this mixture. Price, 65 cents per Dozen; \$5.00 per Hundred. (50 at 100 rate.)

Late or May-Flowering Cottage Garden Tulips

Coming into bloom two or three weeks later than the early flowering types, and extending the Tulip season over a period of four weeks or more. On account of their extreme hardiness, they are specially adapted for the permanent hardy flower border, where they should be liberally planted in clumps or masses. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut flowers, having long stems with flowers of great substance, they stand in perfect condition for a long time. In planting, the bulbs should be set a little deeper than early Tulips, a covering of four inches being about right.

Tall growing and late blooming, with large, long leaves and tall, erect flower stalks, which support great waxen blooms, larger than teacups, of the most vivid, glossy coral red, each flower showing a deep blue-black blotch at the base that further enhances its beauty; in bloom a long time.

Feathered or Cockade HYACINTHS

A real curiosity. One of those pretty, odd things that everybody likes. Perfectly hardy in the garden and fine for pots. Price, twelve for 50 cents.

GRAPE HYACINTHS

Very pretty, producing flowering spikes about six inches high, with little round bells so arranged as to resemble a bunch of grapes. Admirable for permanent beds and edgings and partially shaded situations, where they should be planted in groups of one dozen or more, where they will soon spread and being perfectly hardy will take care of themselves. They are very pretty when grown six in a pot in the house for winter flowering.

Mixed varieties, 10 cents each; \$1.00 per dozen; \$8.00 per 100.

IXIAS

The graceful flower spikes of the Ixias remind one of Gladiolus, but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them quite popular. For pot culture, plant six in a five-inch pot, and treat as Hyacinths. For outdoor culture they should be planted in a somewhat sheltered situation and protected with leaves or straw.

We can most heartily recommend this collection to our patrons. It will make a magnificent circular bed three and one-half feet in diameter. Price, 50 bulbs for \$2.50, postpaid.

CROCUS First Gay Flowers of Spring. Large Flowering Varieties.

Beautiful for growing in pots, among the Earliest to bloom on the lawn in the Spring.

DIRECTIONS FOR PLANTING—With a trowel or spade make a slanting opening about two inches deep, put in the bulbs, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. They will care for themselves, blooming early amid the grass, and dying down to the bulb in ample time to be entirely out of the way of the lawn mower.

LOW OR ALL COLORS MIXED, ALL LARGE BULBS, 35 CENTS PER DOZEN, POSTPAID.

WINTER-BLOOMING FREESIAS

WHITE FREESIAS (Purity)—A grand Freesia. The flowers are two inches long and about the same in width, and borne in clusters of six to ten. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicate. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some place and repot at proper season in fresh soil for another year's growth. Price, 6 for 25 cents; 45 cents per dozen.

NEW GIANT COLORED FREESIAS

A new class of large flowered, strong growing Freesias of various and distinct colors. The size, richness of color and beauty of these Freesias will be a revelation to all.

MIXED COLORS—6 for 40 cents; 12 for 75 cents.

CHIONODOXA LUCILAE

Glory of the Snow

These bulbs are very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen in the garden among the earliest spring flowers—sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. For window culture they are fully as charming as are Freesias. They bloom very early, commonly by Christmas. Selected bulbs. Price, 50 cents per dozen.

GIANT SNOWDROPS

The Charming Snow-drop is one of the First Flowers to Herald the Approach of Spring.

Beautiful dwarf white flowers, pushing up through the snow in the spring, a habit from which arose this name. Being dwarf, they are usually planted along walks or the margins of beds.

Great Surplus Bulb Collections

SENT ONLY AFTER NOVEMBER 10TH

In importing enormous quantities of bulbs from Holland, France, China, Japan, Bermuda, etc., we find it impossible to estimate what the exact demand will be, and to order just the right quantity of each variety, so that we usually have a surplus of many varieties including the very choicest and most expensive. As they cannot be kept over, we must close them out at the end of the season, and offer them to our patrons in collections, strictly of our own selection, at a big sacrifice rate.

These collections may be ordered at any time, but will not be sent until the rush trade is over, about November 10th.

Surplus Bulb Collection No. 1, for One Dollar, Postpaid

This will consist of a very generous lot of miscellaneous bulbs, and will be sent by mail, for \$1.00.

Surplus Bulb Collection No. 2, by Express (not prepaid), for \$2.00

This will contain a larger proportion of the heavier and more expensive bulbs, of the finest varieties, and will be worth far more than the price asked for it. If express shipment is not desirable, send 25 cents extra for postage.

EITHER OF THESE COLLECTIONS WILL AGREEABLY SURPRISE AND PLEASE YOU.

Yellow Maman Cochet (Mme. D. Matrat.) The unusual hardness of this Rose—a pure Tea—makes it especially adapted for bedding. A fitting companion to those other grand summer Roses—the White and Pink Cochets. Flowers large, perfectly double and shapely, of a rich sulphur-yellow.

OUR "GARDEN COLLECTION" OF CHOICE EVER-BLOOMING TEA ROSES

For Outdoor Bedding or Indoor Pot Culture

PRICE, YOUNG PLANTS, 15c EACH; 12 FOR \$1.50. TWO-YEAR-OLD PLANTS, FROM FOUR-INCH POTS, 40c EACH; 12 FOR \$4.00.

THE ROSES in this collection are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November. Some of them are particularly famous for the large size, beauty and brilliant colors of the bloom. If planted in the spring so that they may become thoroughly established during the summer, they will, with few exceptions, prove hardy here, with protection during the winter. They are the product of years of experience and our improved methods of culture, which insure plants of the greatest possible vitality and abundance of bloom.

Alexander Hill Gray Color is deep lemon-yellow which intensifies as the blooms develop; flowers large, of great substance and perfect formation; it has a high-pointed center from which the petals gracefully reflex. We recommend it highly.

Bridesmaid The most popular pink Tea Rose. Thousands of this variety are grown every year for cut flowers, and it is also very desirable for summer bedding out of doors. It is a delightful shade of bright pink, very free flowering and easily grown.

Blumenschmidt Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger, which it resembles in form, and which has a more vigorous growth. Winner of three first premiums.

Clothilde Soupert Color a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well known Malmaison. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom. Form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in mid-summer a bouquet of splendid buds and open flowers can be obtained from this variety. Hardy with protection.

Etoile de Lyon This magnificent Tea Rose, south of the Ohio river, has proved to be perfectly hardy. Blooms in the greatest profusion and each bud in a gem. Flowers are very large, double, full and deliciously fragrant. The color is a beautiful chrome-yellow, deepening at center to pure golden-yellow.

Mlle. Franzisca Kruger The striking color of this handsome Rose places it at once in the front as a bud producer in the open air. In its shading of deep coppery-yellow it stands unique and distinct from all others. The flower, when open, is of good size and very symmetrical. One of the finest Roses to plant in masses and clumps.

Helen Good, the Beauty Cochet This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good as, if not better than, any Rose for the garden ever sent out. The color is white suffused with pink, each petal edged deeper.

Lady Hillingdon Handsome flowers of clear apricot yellow; hardy; of much vigor, and with an autumn blooming habit.

Marie Guillot This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class; flowers of an unusual style, entirely double to the center; very sweet scented.

Souvenir de Pierre Notting The bloom is very large, perfectly full, elegant form; has a beautiful long bud; the colors are very bright, distinct and clear and have no unpleasant tones—orange-yellow, bordered in carmine-rose.

The Bride The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double measuring from three and one-half to four inches in diameter. The color is a delicate creamy-white. The blooms can be cut with long stems and will last in a fresh state being cut longer than any known variety.

Alexander Hill Gray.

Helen Good.

TENDER CLIMBING ROSES

These are not hardy in the North. In the South or on the Pacific Coast, where they stand the winters, nothing can compare with them for beauty of bud and foliage. Are never to be forgotten when seen in full bloom, loaded with thousands of magnificent flowers.

PRICE, YOUNG PLANTS, 15 CENTS EACH; 12 FOR \$1.50. LARGE TWO-YEAR-OLD PLANTS FROM 4-INCH POTS, 40 CENTS; 12 FOR \$4.00.

Marechal Niel, the Most Popular of All This is one of the Roses that starts rather slowly, and for that reason the best success will be had with the larger plants. This superb Rose is especially recommended for Southern states, requiring little outdoor protection. Rich golden-yellow.

Mrs. Robert Peary, or Climbing Kaiserin The flowers are extra large, full, deep and double; are of excellent substance and produced on long, stiff stems, like a forcing Rose; buds are long and pointed. Pure ivory-white. Fragrance is delicious.

HARDY JUNE ROSES, Hybrid Perpetuals

Price, Plants from 2½-inch pots, 15 cents each, \$1.50 per dozen. Two-year-old Plants from 4-inch pots, 40 cents each, \$4.00 per dozen, except where noted.

Though called Perpetual, it must be understood that they are not such early and constant bloomers as the ever-blooming Rose. The Hybrid Perpetuals should not be ordered for house culture as they are not suitable for that purpose. These Roses are especially suited to plant in all the Northern states and territories, also in the colder parts of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

American Beauty Flowers very large, of beautiful form and very double; color a deep, rich rose. The fragrance is delightful, resembling La France. A true ever-bloomer, each shoot producing a bud. This popular Rose is too well known to need further description. Price, small plants, 20 cents each; strong plants, from 4-inch pots, 45 cents each.

Conrad F. Myer This magnificent new Rose is perfectly hardy and blooms all through the summer and fall. The flowers are four inches across, perfectly full and double. The color is clear flesh-pink, with bright red center; it is very sweet and has the delightful fragrance of the Wild Rose or Sweetbriar. It is extremely free from the attacks of insects, rust or blight. This is certainly a grand variety.

General Jacqueminot A rich velvety crimson.

Gloire de Lyonaise This grand Rose is the only yellow Hybrid Perpetual that has been pro-

duced. It cannot be called deep yellow, but rather a pale shade of chamois or salmon-yellow deepest in center, sometimes passing to a rich creamy-white, finely tinted orange and fawn.

J. B. Clarke A vigorous grower with handsome foliage, deep red on the young shoots, changing to deep green with age; a free perpetual bloomer; color brilliant crimson shaded scarlet; very large and of exquisite form, with large smooth petals slightly reflexed on the edges; does not burn in the sun; very fragrant.

Magna Charta A bright, clear pink, flushed with crimson; very sweet, flowers extra large, with fine form and very double.

Mme. Charles Wood Color very bright, rich cherry-red; blooms the first season and all the time, and is delightfully fragrant. May be called an ever blooming Hybrid Perpetual.

Paul Neyron Deep shining rose, very large.

Has excellent keeping qualities.

Rosarie (Pink Tausendschoen)—Similar to its parent Thousand and Beauties, except color, which is a solid deep rose with much larger clusters and many blossoms.

Tausendschoen A rapid growing, almost thornless, climber of exceptional value and attractiveness. Its innumerable flower clusters show every shade of pink, rose and crimson with white and yellow variegation.

The Beacon A distinct and effective novelty, bright fiery-red with white eye in the way of American Pillar, single and semi-double, produced in large clusters, handsome foliage.

TWO-YEAR-OLD EVER-BLOOMING ROSES FOR IMMEDIATE EFFECT

THESE large Roses have become so popular among our customers that we devote a great deal of room to them, growing them in constantly increasing numbers. These bushes are two years old, strong and healthy. They make, of course, more of an appearance from the first than does the smaller stock, having practically a year the advantage in all respects—an advantage for which we find many persons willing to incur the additional expense.

The selection must be left to us, and we will send only strictly high-grade Roses. All will be different and all correctly labeled.

Stim-U-Plant

MAKES A WONDERFUL GARDEN
A PLANT FOOD IN TABLET FORM

THE IDEAL YEAR-ROUND FEEDING METHOD

Feed your plants as you feed yourself. Do not give them breakfast, dinner and supper at one time, for an overfed plant gets indigestion and is harder to get back to healthy growing conditions again than one that has been underfed.

Plants in pots, especially when growing vigorously, soon use up the nourishment that is in the soil, therefore, to keep your plants healthy, feed them about every ten days or two weeks and avoid the error of feeding too much at one time.

STIM-U-PLANT TABLETS are an ideal food for potted plants. They are clean, they take up small space and one-quarter of a tablet is enough to use at a time on small plants.

EASY TO USE

Simply insert the tablet about one and one-half to two inches below surface of soil at the roots, where it dissolves and produces the qualities which mean the same to a plant as blood to a human being.

Price, postpaid: 30 tablets, 25 cents; 100 tablets, 75 cents; 1,000 tablets, in bucket, \$3.50.

CULTURE OF CACTUS

The Cacti may be planted either individually in pots or collectively in bowls. When the plants are arranged in bowls without drains, the top level of the soil should be above the level of the bowl so that most of the water will run off. Enough will penetrate to moisten the soil. There should never be enough water at any time for the water to stand in the bottom of the bowls. This sours the soil.

Cactus may be ordered by number.

FERNS Most Beautiful of Decorative Plants

FOR THE HOUSE AND CONSERVATORY

No plants are easier to grow or more ornamental for house or conservatory culture than these grand new Ferns. They require very little care or attention, and produce a finer effect than any other plants you can get for many times their cost. The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.

ANY OF THE FOLLOWING FERNS IN NICE YOUNG PLANTS, 20 CENTS EACH;
6 FOR \$1.00. STRONG FOUR-INCH POT PLANTS, 50 CENTS EACH;
6 for \$2.50.

"Teddy" Junior Fern

"TEDDY" JUNIOR

(The Fern for Every Household)—It is a sport from the now famous Roosevelt Fern, and while its habit of growth is to produce a shorter frond, it retains all the valuable characteristics of the parent plant. "Teddy" will produce about four times more fronds than any other Fern ever introduced.

VERONA

A handsome new variety of the Elegantissima type, somewhat resembling the N. Whitmanii, but with finer ostrich plume foliage and with a stiffer midrib which makes the fronds stand up better than most varieties of the lace ferns.

THE "ROOSEVELT FERN"

(Nephrolepis Roosevelt)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

THE POPULAR BOSTON SWORD FERN

(Nephrolepis Exaltata Bostoniensis)—In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

OSTRICH PLUME FERN

(Nephrolepis Whitmanii)—An improvement on the Nephrolepis Elegantissima, with still more gracefully divided pinnae, giving the whole plant an airy lace-like appearance; makes beautiful symmetrical plants even in small sizes and large specimen plants are beautiful beyond description.

NEPHROLEPIS SPARROWII

We take pleasure in offering to our customers this valuable variety, a true sport of the Neph. Superbissima (or fluffy Ruffles) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this variety most highly.

Innisfallen.

New Fern INNISFALLEN

This handsome new variety originated with us. It is of the Elegantissima type, a strong and rapid grower, handsome green foliage, and has a stiff mid-rib which makes the fronds stand up better than most varieties of ferns. It has a distinctness of its own and is most desirable in all respects. Price, young plants, 25 cents each; large plants, 50 cents each.

We have some extra fine large plants of
all the above named Ferns.
PRICE—\$1.15 each, Two for \$2.00.

PRICE, 12 CENTS EACH; SIX FOR 60 CENTS; \$1.10 PER DOZEN.

Crytomium Falcatum (Holly Fern.) We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality.

Pteris Wimsetti Green leaves, with the ends very peculiarly twisted. It is one of the best varieties for Fern dishes, being a short, compact grower. Will stand much rough treatment.

Adiantum Cuneatum (Maiden Hair Fern.) A very beautiful and graceful Fern, its delicate fronds being much used for cut flower work.

Pteris Cretica Alba Lineata A very handsome Fern, nicely variegated, grows very rapidly into handsome plants.

Pteris Wilsoni An ornamental Fern of unusual merit. One of the most dwarf of this class, having deep green foliage, leaves heavily crested, giving it the appearance of a tassel. A fine addition to the ornamental varieties.

Moss Fern (Selaginella Emiliana)—An upright-growing moss with delicate lace-like foliage. Suitable for Fern dishes or for table and house decorations.

Dracaena Lord Wolseley

Asparagus Plumosus.

Asparagus Plumosus Nanus

(Lace Fern.) One of the handsomest of our foliage plants. The leaves are a bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality when cut is remarkable, retaining their freshness for weeks, hence it ranks as the most valuable plant we have for this purpose, surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. The Wonderful NEW VARIEGATED YUCCA

This plant is a strong and vigorous grower, free from all blights and insects, absolutely hardy, surviving our northern winters in the open field without any protection whatever. Will also survive hot-dry weather.

It is this stage that brings out the real winter beauty, especially with a background of snow. The only dull period in its life is during March and April after which it starts anew and in late June throws up beautiful large-drooping-waxen-like white blooms on a stalk three to four feet high, exactly as the regular Yucca.

HARDY OUTDOOR FERNS

Just the thing for that shady place around your house where most flowers will not do so well. Plant these Ferns about 12 inches apart, the crown level with surface of ground, and give them a thorough soaking to settle the soil around the roots and a mulch to preserve moisture. The planting season runs from October 1st to June 1st. Fall planting gives the soil a chance to settle solid around the roots which will insure stronger growth for the first year. Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mould into the soil of a fern bed. While few ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded. Most of them, even those that grow naturally in very wet places, do nicely under ordinary garden treatment, in the matter of moisture. While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter.

WE OFFER ONLY THE TWO MOST POPULAR VARIETIES.

Ostrich Fern (*Oncoclea Struthiopteris*). Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect, handsome species, graceful as a palm. Its vase like masses of foliage are dark green and it is one of the tallest of our ferns. Price, 30 cents each; 6 for \$1.60; 12 for \$3.00.

Christmas Fern This fern, when grown under ideal conditions, attains a height of three feet, its peculiar grace and beauty makes it desirable in all fern gardens. Price, 30 cents each; 6 for \$1.60; 12 for \$3.00.

KOLKWITZIA—New Flowering Shrub from China.

BEAUTY BUSH (Kolkwitzia Amabilis)

Every succeeding year emphasizes the garden value of this plant for which the descriptive title of Beauty-Bush has been aptly coined. It is a twiggly shrub, growing from 6 to 8 feet tall, with the inner stems erect or ascending and the outer ones arching to the ground, the whole plant forming a dome-shaped mass. The flowers are produced along the whole length of the branches in clusters at the ends of short, leafy shoots. They are tubular with a gaping mouth, deep pink without, stained with yellow-brown on the lower throat and lip.

The graceful habit of the plant, its free-flowering qualities and pleasing color, combined with perfect hardiness, make this one of the most beautiful, as well as most useful, shrubs that China has given to the gardens of this country, and is destined to become one of the most familiar plants in our gardens.
